SMART INFRASTRUCTURE

Powering smart cities with reliable, renewable energy

REVOLT ENERGY

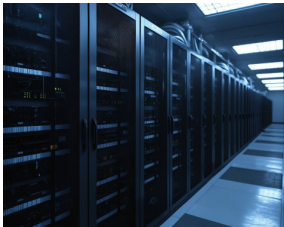

SMART LIGHTING	EV CHARGING HUBS	OFF-GRID POWER TELECOM TOWERS	EMERGENCY BACKUP DATA CENTRES

SMART INFRASTRUCTURE

Growing cities put national grids under pressure: rising demand, summer peaks driven by air-conditioning, and variable solar and wind power to integrate.

$LiFePO_4$ battery storage and hybrid systems for urban microgrids, smart lighting, EV charging and backup power for critical infrastructure.

ADVANTAGES

- Continuous 24/7 power, including off-grid sites
- Designed for high-temperature operation
- Easy integration with solar, smart grids and IoT monitoring
- Lower operating and maintenance costs

RECOMMENDED REVOLT SOLUTIONS

E-Container™ · EHOME-10™ · Mobile Energy Storage

Empower your smart city with reliable energy storage.

Request a tailored feasibility study for your municipality.
